## Freehand® Herbicide

For pre-emergent control of weeds associated with ornamental plants in containers, in ground and for warm season turf.

Freehand® Herbicide offers the ornamental grower and turf manager a new tool for pre-emergent weed control of broadleaf and grassy weeds. Its two unique active ingredients, pendimethalin and dimethenamid-P, prevent weeds from growing and multiplying by inhibiting cell growth in seedling shoots and impeding plant cell microtubule assembly in roots. This powerful herbicide is labeled for the control and suppression of more than 60 of the toughest, most troublesome weeds; promoting higher quality and more marketable plants, and more attractive turf.

## Freehand® Herbicide

- A unique combination of two modes of action (Groups D and K) for broader spectrum weed control and resistance management.
- Safe on a broad range of ornamental crops and warm season turfs.
- Provides up to three months of control and suppression of over 60 of the most toughest weeds.
- Its granular formulation and excellent particle distribution allows for easy spreading and flexible application rates.
- Very stable on the soil surface and does not need to be watered in immediately.

AVAILABLE DIRECT FROM GCP

### Freehand® Herbicide

**Code:** FREEHAND227 22.7 Kg

**Active Ingredient:** 10 g/kg Pendimethalin  
7.5 g/kg Dimethenamid-P
