GCP's New PotHead™ to Suit P300ST

Dramatically reduces weed burden in pots by blocking light to the growing media to stop weed seed germination

Significantly reduces the need for labour and chemicals in your weed management program

Ventilation system prevents soil heating, reduces water loss and spreads water evenly

Stop the displacement of growing media in heavy rain, hail or wind

Tough, UV resistant, long-lasting design, Australian made from 100% PP5 recyclable plastic

140mm and 200mm PotHeads™ coming soon, more sizes currently under development

NEW-DW300ST
