

INITIATOR

SYSTEMIC INSECT CONTROL WITHOUT SPRAYING

Container sizes available
750g = 300 tablets
3kg = 1,200 tablets

Initiator[®]

Initiator tablets provide enhanced growth and long lasting protection against damage caused by:

- Aphid
- Scale
- Psyllid
- Azalea lace bug
- Mealybug

that attack containerised, newly planted and established plants. The tablets are designed to be placed in the soil adjacent to existing plants or in the planting hole during transplanting of shrubs and trees, so that the growing plant can take up the fertiliser and the systemic insecticide

**For strong and healthy plants
give them a tablet**
