Jiffy Pot DK2C Technical Data Sheet

March 2022

JIFFY
POTS

Product description

Jiffy Pot DK2C Original range is suitable for propagation, young plants production, hydroponics, indoor plants. Do not have to be removed, when been replanted, harvested, discharged, as it is 100% home compostable.

Purpose

The Original range of pots can be used for all kinds of crops, such as annual plants, terrace plants, houseplants, vegetables, herbs, and many other plants. Can be used in combination with Jiffy pellets "QSM" range, or one of many Jiffy growing media solution mixes.

Preparation

Make sure you have a tray or gutter system with a good drainage, and if possible, with air circulation around the pot. Fill pots with the growing media, and make sure well-watered before or after planting or sticking. Keep them well watered, during the production period.

Notes

The manufacturer warrants, that the pots have been made to meet the standard for sustainable / organic production.

Packaging

Cartons	Loose on pallets	Ship weight (kg)
Different kind of packaging solutions may vary from size to size. Thus, the weight will also vary according to the size of the pot.
