SLASHER20 20 L

Garden City Plastics is proud to announce and introduce two new additions to our team in Elliott and Reyhaneh who are both Professionals in Agronomics each with different skill sets and backgrounds. These two new energetic members of our Nationwide team, will add to our already talented group of experienced horticulturalists and agribusiness operators. Reyhaneh and Elliot will be helping to problem solve within our Client's business operations. They will assist GCP to prepare and respond even more proactively to the requirements of our customers as needs and best practices evolve. Both Reyhaneh and Elliott will be based out of our head office in Melbourne. Travelling the country to visit farms and businesses of all types. A short introduction to each is shown below:

Elliott Akintola (BTech Agri) is an energetic professional with a Bachelor of Technology Agriculture – Specialising in crop production from the Federal University of Technology, Minna, Nigeria. He has also attended specialised training in Sales Administration, Customer Management & Marketing from the Lagos Business School – Pan Atlantic University, Nigeria.

He has gathered over 4 years' hands-on experience in providing tailored technical agricultural services, business development, customer management and sales and marketing administration within the agribusiness industry whilst working with one of the largest Agricultural companies in West Africa.

He brings his expertise and a track record of excellence into the Australian Horticultural space to create a balanced / unique understanding of traditional and more technologically enhanced techniques to derive value, drive innovation, positive growth and change.

Reyhaneh Pordel (MSc, PhD) holds a Master of Molecular Biology and PhD in Agronomy. She is an agronomist with strong work experience in the field of sales agronomy, horticulture agronomy and plant physiology in Canada and Iran. During her 7 years of commercial experience, she worked with targeted organizations to create profitable long-term relationships and served as a key customer contact. She identified, analysed and prioritised customer needs by identifying solutions to enable businesses to get on with business.

Her expertise lies in successfully enhancing operational strategies, innovating new processes and managing overall plant functionality to maximize productivity and efficiency while reducing costs and achieving production goals. As a highly skilled and successful agronomist with knowledge of driving successful operations, Reyhaneh's focus will be on beneficial customer outcomes combining field trial experience and industry knowledge that will contribute to the success of businesses she deals with.

We look forward to welcoming Elliott & Reyhaneh to the Garden City Team
