Be Fantastic Recycle your plastic!

Ensure your business has another green sustainable tick to it by recycling all your plant pots, carry trays and labels. Visit the PP5 website to see all the places you can go to for recycling. It's simple to just *check, tap and stack* your pots and trays, including plant labels, to ensure they are collected and made back into plant pots and carry trays once again.

pp5.com.au

What's the easiest way to control these garden pests...
elm leaf beetle | aphids | psyllids | azalea lace bug
...and other sucking insects?

The solution?

Just a simple tablet. Not just any tablet but an **INITIATOR TABLET!!!!** All you need to do is apply one to the soil at around 5 to 10cm depth at the drip line of any plant.

- For small plants use one tablet per metre of plant height.
- For larger plants you'll need to measure your trunk and apply one **Initiator** tablet per cm of trunk diameter.

Best of all, the tablets are well under \$1 each!!! So use **Initiator** tablets around your root system and this will transport the insecticide up to your top tips and keep most bugs at bay for 12 months.

Available sizes

INIT1750	750g	300 tablets
INIT13	3kg	1,200 tablets

TURF, LAWN & GARDEN BED FERTILISERS

New Grass & Renovation is a controlled release base feed, ideal for use when laying new turf or resowing.
NPK: 20-20-8-21
 OLSLNG | 15kg | 3 months

Maintenance provides a strong initial boost coupled with a longevity ideal for maintenance applications.
NPK: 20-0-6-12+2.1Ca+1.8Mg
 OSLMAIN | 15kg | 2-3 months

Flora provides season-long nutrition for garden beds, pots and high-mown turf. Ideal for plant-out or topdressing of ornamental plants. Also provides excellent performance and long-term feeding of potted plants.
NPK: 16-3-11-16.3+1.8Mg+TE
 OSLSFLORA | 15kg | 8-9 months

All Round fertiliser designed with a 4-5 month release suited to turf applications where a steady release of nutrients is required to ensure balanced growth and good root development.
NPK: 24-5-8-19+2Mg
 OSLSALLRND | 15kg | 4-5 months

MAKE YOUR GARDENS THE BEST IN TOWN

Designed for landscape
 Fully coated fertiliser for landscape use. Available in a range of time releases to suit all garden situations to give you steady growth with a minimum of fuss.
NPK: 17-3.9-6.6-2.4Mg*
 OSAGBTOTAL89 8-9 months* 25kg
**other blends available!*

All purpose with organic certification
 Now available in both granules & pellets. A natural all-purpose garden and turf fertiliser with trace elements. Ideal to add when planting and/or as a top dress application at any time.
NPK: 3-1.8-1.7
 AGRIP Agri boost pellets 25kg
 AGRIG Agri boost granules 22.5kg

10 week release Osmoform NXT
 Complete plant fertiliser. An excellent balance of all essential plant nutrients. Ideal as a top dress or for when planting out.
NPK: 22-2.2-9.1+1.2Mg+TE
 OSFORMNXT 8-10 weeks 20kg

Tablets for easy feeding
 Easy way to accurately feed plants up to 12 months. Approx. 1500 tabs per carton. Nutrition for street trees and landscape plantings.
 OSEXTAB89 8-9 months 7.5kg
 OSEXTAB1214 12-14 months 7.5kg

**NEW
to
GCP**

NEW Seasol Trilogy
 Seasol Trilogy 631 is formulated to boost natural soil ecosystem and plant growth processes. Ideal as a planting application, improving soil microbiology and as background nutrition.

- For stronger root growth and healthier crops
- Provides plant and soil benefits
- Support and improve plant resilience

 SST6315 - 5L & SST63120 - 20L

LIQUID FEEDING

Drum pumps
Ezi-action® drum pump

Ezi-action® drum pumps are the best hand drum pumps in the world. They are the most dependable manual dispensing system for bulk containers.
 Available for 20L & 200L drums

WETTING AGENTS & WATER SAVING

Wetting agents ensure your plants have the most water uptake when it's applied. Reduces runoff and improves moisture penetration. Makes clay soils breathe and sandy soils hold more moisture. All this encourages a healthier root system and a healthier plant.

Hydraflo 2—Granular *Active constituent: granular non-ionic surfactant formulation (ICL)*

OSHYDRAFL0220 20kg | OSHYDRAFL021T 1T

Hydraflo L—Liquid *Active constituent: liquid non-ionic surfactant formulation (ICL)*

OSHYDRAFL0L5L 5 L | OSHYDRAFL0L20L 20 L | OSHYDRAFL0L200L 200 L

MoisturAid—Granular *Active constituent: impregnated liquid wetting agent into a fossilised sponge (Yates)*

NCMOI25 25kg

PLANT PROTECTION

INSECTICIDES & MITICIDES

Procide 80SC | OSPROCID1LT 1L

Active constituent: 80g/L Bifenthrin (ICL)

Procide is an advanced contact and long term residual concentrate insecticide for use on all ornamental plants. Procide is ideal as a preventative application during known higher insect activity times. A fortnightly application ensures full protection against target pests. Controls mites, thrips, white flies, caterpillars and loopers, moths, mealy bugs and more. This spray contains a surfactant. Safe to apply to plant foliage with minimal risk of burning.

Crown 225 SL | OSCROWN1LT 1L

Active constituent: Acetamiprid (ICL)

Completely systemic through root and leaf uptake. Also works on contact with target pests. Controls greenhouse whitefly, rose aphids, thrips, psyllids, scale insects (except white scale), azalea lace bug and leaf hoppers. Also controls fungus gnats in media.

Liquid Confidor | CON1 1L

Active constituent: Imidacloprid 200g/L (Bayer)

Confidor 200SC will control green peach aphid, silver leaf whitefly, woolly aphid, harlequin bug, psyllids, azalea lace bug, elm leaf beetle, grey cabbage aphid and turnip aphid on an extensive range of vegetables, plus various other insect pests in ornamentals.

Azamax | AZAMAX1 1L & AZAMAX5 5L

AzaMax™ contains botanical oils and concentrated botanical extracts. An antifeedant on mites, aphids and fungus gnats.

PyGanic | PYGANIC1 1L & PYGANIC378 3.78L

PyGanic® is a fast knockdown insecticide making it compatible with IPM due to the fact that no residues remain after spraying. PyGanic® is a known insecticide resistance breaker because the natural variation of pyrethrums in the product prevents insects building any resistance.

eco-oil HIPPO | ECOOIL5 5L & ECOOIL20 20L

eco-oil® is Australia's first botanical oil based organic miticide/insecticide made from 100% Australian-grown oils. eco-oil controls a broad range of insects, including scale, mites, aphids, whitefly and citrus leafminer. Because eco-oil uses light botanical oils that boil off plant surfaces fast, there is less risk of burning foliage with eco-oil than with white oil and other mineral/petroleum oil sprays. This also allows eco-oil to carry no withholding period for edible crops.

Initiator tablets | INITI750 750g (300 tablets) & INITI3 3kg (1200 tablets)

Initiator® tablets provide enhanced growth and long-lasting protection against the damage caused by various insects that attack containerised, newly planted and established plants. The tablets are designed to be placed in the soil adjacent to plants or in the planting hole during the transplanting of seedlings, so that the growing plant can take up the fertiliser and the systemic insecticide, imidacloprid.

WEEDS ELIMINATED

Slasher | SLASHER1 1L & SLASHER5 5L & SLASHER20 20L

Active constituent: Pelargonic acid 60% (OCP)

To control annual and perennial weeds in all nursery and garden situations. If sprayed at 8am on a sunny morning, weeds are brown by 3pm that day. Suitable for use on pathways, fence lines, around the base of larger trees and spot spraying where necessary. Also controls mosses and lichens in shadier garden beds and pathways.

The only organic herbicide on the market!

Glyphosate (450g/L) | GLYPH20 20L Round-up 360 (Bi-active) (360g/L) | RUP5 5L & RUP20 20L

Active constituent: Glyphosate

Water-soluble non-selective herbicide for controlling a wide range of everyday weeds in gardens and commercial situations. It is absorbed by the foliage and goes to the roots, ensuring the plant can no longer grow.

Basta | BASTA20 20L

Knockdown herbicide designed for speed. To achieve maximum results, targeted weeds should be young and actively growing.

- A non-volatile herbicide with non-selective activity against many annual and perennial broadleaf weeds and grasses.
- Absorbed by plant foliage & green stems. It is not significantly translocated as an active herbicide throughout the plant & therefore will only kill the part of a green plant that is contacted by spray.
- Basta has no significant soil activity and is rapidly degraded by micro-organisms in the soil.

Sierraron G | OSSIERRARON25 25kg

Proven pre-emergent weed controller.

Continues working for up to 6 months. It is an extra resource in the battle against weeds with your current control measures. Ideally used in autumn and spring for control over the following weed growth periods.

Use on areas such as:

- fence lines, playing field perimeters,
- paths and playgrounds.

Barricade | BARRI1 1L & BARRI5 5L

Barricade is a pre-emergent herbicide offering extended residual activity on Winter Grass, Summer Grass, Crowsfoot on a range of turf surfaces. It provides season-long control for up to 6 months.

Specticle | SPECTICLE1 1L

Specticle herbicide is registered to control a range of over 30 annual grasses and broadleaf weeds. It is an innovative herbicide that sets a new standard for pre-emergent weed control in bare ground areas of ornamental production nurseries.

Specticle is labelled for use in maintaining:

- bare ground in outdoor production areas
- access areas like driveways and walkways
- around infrastructure such as buildings and fence lines.

SPRAYERS—BATTERY DRIVEN

Solo

Garden City Plastics stocks a wide range of pump- and battery-operated Solo sprayers.

Made in Germany and of exceptional quality, we'll have the sprayer for you!

Whether it be a 1 litre handheld sprayer, a 9 litre trolley sprayer or a 20 litre backpack sprayer.

solo

Mankar

Mankar offers an alternative to pressure sprayers with their patented atomiser system.

This allows for the use of high-concentrate products, saving refilling time and resulting in less weight to carry!

Available in a range of handheld sprayers with spray widths of up to 45 cm and a trolley sprayer with a spray width of up to 110 cm.

MANKAR

RODENTICIDES

SELONTRA® SOFT BAIT | SELONTRA5 5kg

ACTIVE CONSTITUENT: 0.75 g/kg COLECALCIFEROL
Registered for use along perimeter fence lines, in and around agricultural buildings. Emergency & minor use permits for use in strawberry, blueberry rubus and rubus hybrid crops.
